Consent to Treatment and Release of Liability Form

I, parent/guardian, of student-athlete understand that Children's Hospital (CHNOLA) contracts with the student-athlete's school to provide athletic training services as outlined by the National Athletic Trainers' Association (NATA) and the Louisiana State Board of Medical Examiners (LSBME). I give permission to CHNOLA Sports Medicine personnel to assess, treat, rehabilitate, and, when indicated, recommend referral to an appropriate medical provider to treat the student athlete's injury or condition.

I agree to allow the CHNOLA Sports Medicine personnel to utilize modalities, rehabilitation techniques, and any other treatment as outlined in the CHNOLA Sports Medicine Standing Orders. In the event of an emergency, I understand that CHNOLA Sports Medicine personnel will contact Emergency Medical Services (EMS) when advanced medical care and emergent medical transportation is needed.

I authorize CHNOLA Sports Medicine personnel to administer and utilize a baseline and post-injury neurocognitive concussion testing program through ImPACT Applications. CHNOLA Sports Medicine personnel will share this information with medical providers directly involved in the student-athlete's care during the process of return to learn and return to play following a head injury. Information regarding this testing program can be found at www.impactconcussion.com.

Acceptance of Risk and Release of Liability

I understand the inherent risks involved with the participation in athletic events which can lead to minor and major injuries. I understand that neither the protective equipment and padding used in sport, the safety rules and procedures of the sport, the coaching instruction received, nor the athletic training care provided to student-athletes will guarantee safety or prevent injuries that may be sustained as a result of participation in athletic events. I agree not to hold CHNOLA Sports Medicine personnel responsible for any injury, loss, or damage that occurs to the student-athlete as a result of athletic participation.

Statement of Permission

I have read and fully understand this consent to treat and release of liability. I voluntarily sign this without inducement. I give permission to CHNOLA Sports Medicine and all associated with CHNOLA to assess, treat, and rehabilitate the student athlete as needed. I understand that this consent and waiver to liability will be in effect as long as the student-athlete is enrolled in the associated school. However, I understand that I may withdraw my consent from such care at any time without affecting my right to future care or treatment. I may revoke my consent in writing at any time by contacting CHNOLA Sports Medicine personnel.

LHSAA SUBSTANCE ABUSE/MISUSE CONTRACT AND CONSENT FORM

This form must be completed and signed and kept on file with the school and is subject to inspection by the LHSAA Rules Compliance Team.

As an LHSAA athlete, I, _____, agree to avoid the abuse or misuse of legal or illegal substances, including anabolic steroids and other performance enhancing drugs. I hereby grant permission to be tested for substance abuse/misuse as a participant in any LHSAA sports program. I furthermore agree to cooperate by providing a urine or hair specimen for testing upon the request of my principal. I understand that should my specimen indicate the abuse or misuse of legal or illegal substances, I will be subject to action specified in my School Drug Policy for Student Athletes.

I, _____, parent/guardian of the undersigned student-athlete, individually, and on behalf of my child, do hereby grant permission for and consent to said child being tested for substance abuse/misuse in accordance with his/her School Drug Policy for Student-Athletes and I understand that if any specimen taken from him/her indicates abuse or misuse of legal or illegal substances, including anabolic steroids and other performance enhancing drugs, he/she will be subject to action specified in the School Drug Policy for Student-Athletes for his/her school.

Notes: Rule 1.10.2 of the LHSAA By-Laws, states that this contract shall remain in effect for the remainder of the student's eligibility. This means the contract only has to be signed once by both the student and his/her parent or guardian but the terms remain in effect for the student's entire high school career.

According to Rule 1.10.3 of the LHSAA By-Laws, without the signature of the student athlete and his/her parent/guardian, the student is ineligible to participate in interscholastic athletic contests at all levels of play in all LHSAA sports at all LHSAA schools until compliance with Rule 1.10.2 is obtained from both parties.

Any student participating in an interscholastic athletic contest(s) without a properly signed contract shall be classified as an ineligible student and both the student and school shall be penalized according to Rule 1.10.3.

Signature of the LHSAA's contract does not necessarily mean the student athlete will be tested. Federal courts have consistently ruled participation in high school athletics is a privilege, not an educational right.

WHAT IS A CONCUSSION?

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head or body that causes the head and brain to move quickly back and forth. Even a "ding," "getting your bell rung," or what seems to be a mild bump or blow to the head can be serious.

WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports one or more symptoms of concussion after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury. The athlete should only return to play with permission from a health care professional experienced in evaluating for concussion.

DID YOU KNOW?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

SYMPTOMS REPORTED BY ATHLETE:

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Just not "feeling right" or is "feeling down"

SIGNS OBSERVED BY COACHING STAFF:

- Appears dazed or stunned
- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows mood, behavior, or personality changes
- Can't recall events prior to hit or fall
- Can't recall events after hit or fall

► **"IT'S BETTER TO MISS ONE GAME
THAN THE WHOLE SEASON"**

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.
2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.

Important Information about Sudden Cardiac Arrest for Parents and Student Athletes

Starting August 1, 2024, Louisiana Law [Act 421 (R.S. 17:440.3)] requires schools to inform parents and student athletes about heart health. Schools must provide written information about the requirements a student athlete who has or has had a heart-related issue must meet before participating in sports. This information must be given to parents and guardians, and they must sign to show they have received and understood it. This ensures proper communication and safety measures are in place for student athletes returning to play.

What is Sudden Cardiac Arrest (SCA)?

Sudden Cardiac Arrest is the sudden loss of all heart activity (i.e. the heart stops beating). This stops blood flow to the body's organs. It usually occurs because of an abnormal heart rhythm called ventricular fibrillation. If CPR is not started quickly, SCA can lead to death within minutes.

Warning Signs and Symptoms of SCA

- Sudden collapse;
- No pulse;
- No breathing;
- Loss of consciousness

Sometimes other symptoms occur before sudden cardiac arrest. These might include:

- Chest discomfort.
- Shortness of breath.
- Weakness.
- Fast-beating, fluttering or pounding heart; called palpitations.

*But sudden cardiac arrest often occurs with no warning. **If any of these symptoms occur during exercise, the student athlete should STOP PLAY AND SEE A HEALTH CARE PROVIDER immediately.***

Possible Causes of SCA:

- *Structural heart defects, like congenital heart diseases or Marfan syndrome;*

- *Problems with the heart's electrical system (which can make the heart beat too fast, too slow, or irregularly);*
- *Diseases affecting the heart muscle: (such as hypertrophic cardiomyopathy);*
- Heart infections; and
- *Other factors, such as direct impact to the chest.*

Additional Risk Factors:

- *Family history:* Sudden death of a close relative before age 50; history of heart conditions like cardiomyopathy, Marfan syndrome, Long QT syndrome, or heart rhythm problems; and/or history of immediate family members experiencing SCA.
- Heart murmurs
- High blood pressure

Requirements for Return to Play:

If a student athlete has experienced SCA or any of its warning signs, a consultation with a health care provider is necessary. To return to play, the athlete must provide:

- Written clearance from a doctor; AND
- Acknowledgment form signed by the parent or guardian and the student athlete.

More information:

More information may be found at Parent Heart Watch (<https://parentheartwatch.org/>)
